INDEX OF AUTHORS VOLUME 10

A

ANDERSON, O. R. Light and electron microscopic observations on feeding behavior, nutrition and reproduction in laboratory cultures of *Thalassicola nucleata* 401

AUSPRUNK, D. H. and BERMAN, H. J. Spreading of vascular endothelial cells in culture: Spatial reorganization of cytoplasmic fibers and organelles 707

B

BATSON, B. S. Ultrastructure of the anterior sense organs of adult *Gastromermis boophthorae* (Nematoda: Mermithidae) 51

BERMAN, H. J. *See* AUSPRUNK and BERMAN 707

BEYER, R. *See* MULLER, BEYER, PONDALJAK, MULLER and ZAHN 191

BONAR, D. B. Fine structure of muscle insertions on the larval shell and operculum of the nudibranch *Phestilla sibogae* (Mollusca: Gastropoda) before and during metamorphosis 143

—, Ultrastructure of a cephalic sensory organ in larvae of the gastropod *Phestilla sibogae* (Aeolidacea, Nudibranchia) 153

BOSSEN, E. H., SOMMER, J. R. and WAUGH, R. A. Comparative stereology of the mouse and finch left ventricle 773

BOYD, H. and HENSLEY, G. T. A study of cyclic nucleotide metabolism and the histology of rat liver during 3′-methyl-4-dimethylaminoazobenzene carcinogenesis. 1. Histology 463

—, MCAFEE, D.A., and RUBIN, J. J. A study of cyclic nucleotide metabolism and the histology of rat liver during 3′-methyl-dimethylaminoazobenzene carcinogenesis. 2. Cyclic AMP metabolism 477

—, —, LAUMEN, G. and RUBIN, J. J. A study of cyclic nucleotide metabolism and the histology of rat liver during 3′-methyl-4-dimethylaminoazobenzene carcinogenesis 3. Cyclic GMP metabolism 495

BOULIGAND, Y. *See* GIRAUD, CASTANET, MEUNIER and BOULIGAND 671

BOUCHAUD, C. and BOUVIER, D. Fine structure of tight junctions between rat choroidal cells after osmotic opening induced by urea and sucrose 331

BOUVIER, D. *See* BOUCHAUD and BOUVIER 331

BRICKSON, S. A. *See* SOLDO and BRICKSON 609

BROWN, D. C. and COPELAND, D. E. Layered membranes: A possible diffusion barrier to gases in teleostean swimbladders 785

BROWN, G. L. and LOCKE, M. Nucleoprotein localization by bismuth staining 365

BRUMMETT, A. R. and DUMONT, J. N. Kupffer's vesicle in *Fundulus heteroclitus*: A scanning and transmission electron microscopic study 11

C

CAPRIO, J. and RADERMAN-LITTLE, R. Scanning electron microscopy of the channel catfish olfactory lamellae 1

CASLEY-SMITH, J. R. and VINCENT, A. H. The quantitative morphology of interstitial tissue channels in some tissues of the rat and rabbit 585

CASTANET, J. *See* GIRAUD, CASTANET, MEUNIER and BOULIGAND 671

CAYER, M. L. *See* NOIROT-TIMOTHEE, SMITH, CAYER and NOIROT 125

CHUNG, A. *See* RYAN, CHUNG, MARTIN and RYAN 563

CIOCCA, D. R. and GONZALEZ, C. B. The pituitary cleft of the rat: An electron microscopic study 725

CLEMENTS, E. *See* RYAN, CLEMENTS, HABLISTON and RYAN 555

COLEMAN, A. W., SIEGEL, R and COLEMAN, J. R. Ultrastructure and mechanical activity expressed by striated muscle in culture 201

COLEMAN, J. R. *See* COLEMAN, SIEGEL and COLEMAN 201

COPELAND, D. E. *See* BROWN and COPELAND 785

D

DARDICK, I. and SETTERFIELD, G. Early origins of definitive erythroid cells in the chick embryo 355

DAVIS, W. L., GOODMAN, B. P., JONES, R. G. and RASMUSSEN, H. The effects of cytochalasin B on the surface morphology of the toad bladder epithelium: A scanning electron microscopic study 451

—, *See* PETIT, DAVIS and JONES 619

DIEHL, F. A. *See* MARCUM and DIEHL 113

DUMONT, J. N. *See* BRUMMETT and DUMONT 11

DURAN, W. *See* ZAMPIGHI, RAMON and DURAN 413

INDEX OF SUBJECTS VOLUME 10

A

Actin, in giant nerve fibers of the spiny lobster, 687
Adrenalectomy, effects of, on the anterior pituitary of mouse, 571
Adrenal gland, of mouse, 571
Aggregation factor, in sponges. Entire and core structure of the large circular proteid particle from *Geodia cydonium*, 191
Amblema, morphological studies on the mantle of, 619
Anax imperator, dragonfly, differentiation of flight muscle in, 167
AMP, cyclic, metabolism of, in rat liver, during carcinogenesis, 477
Annelid, nuchal organs of, in juvenile and adult, 243
—, *Protodrilus*. I. Muscles and myoepithelial junctions in, 269
—, —. II. The stomodeal epithelium and its cuticle. 289
Artefact, a single spiral, in arthropod cuticle, 39
Arthropod cuticle, a single spiral artefact in, 39
Autoradiography, of vitellogenesis, in the squid *Loligo pealei*, 599
Axons, giant, in a crayfish, structure of electrotonic synapse in, 413
—, —, of the spiny lobster, microtubules and actin in, 687
—, associated with the salivary apparatus of a cockroach, 699

B

Bacteria, xenosomes, in Protozoa, 609
Bird, finch, comparative stereology of left ventricle of, 773
—s, aquatic and terrestrial, fine structure of granules in eosinophil leucocytes in, 303
Bismuth, staining, nucleoprotein localization by, 365
Bladder, toad, effects of cytochalasin B on epithelium of, 451
Bouligand, hypothesis, evidence in support of, in trichurid egg-shell, 647
Bovine, cultured endothelial and pulmonary artery cells of, 441, 555, 563

C

Carassius auratus gibelio, fish, kidney of, 319
Carcinogenesis, induced by 3′-methyl-4-dimethylaminoazobenzene, in rat liver, 463, 477, 495
Catfish, SEM of olfactory lamellae in, 1
Chich, embryo, origins of erythroid cells in 355
Chief cells, of parathyroid of woodchuck, seasonal variations in, 259
Choroidal cells, tight junctions between, after osmotic opening induced by urea and sucrose, 331
Circulatory system, eosinophil leucocytes, fine structure of granules in, 303
— —, isolation and culture of pulmonary artery endothelial cells, 555
— —, origins of erythroid cells in the chick embryo, 355
— —, vascular endothelial cells, spreading of, in culture, 707
Comanthus japonica, crinoid, fine structure of, from zygote through early gastrula, 93
Coelenterate, Hydra, epitheliomuscular cell of, 629
—, hydrozoan polyp *Cordylophora*, anchoring cells (desmocytes) in, 113
Concanavalin A, freeze-etch localization and distribution of, in normal and irreversibly sickled erythrocytes, 219
Connectin, a muscle elastic protein, in rat, 741
Cordylophora, hydrozoan, anchoring cells (desmocytes) in, 113
Corticotrophs, in anterior pituitary of the mouse, 571
Cortisol, effects of, on pituitary of the mouse, 571
Crustacean, brown shrimp, *Penaeus aztecus*, a morphological study of the gills of, 77
—, *Gammarus*, cuticle of, 659
—, *Panulirus argus*, microtubules and actin in axons of, 687
—, *Procambarus clarkii*, giant axons in, 413
Cultures, laboratory, of *Thalassicola nucleata*, feeding behavior, nutrition and reproduction, 401
Cuticle, and epithelium, of pharyngeal bulb in an archiannelid, 289
—, arthropod, a single spiral artefact in, 39
—, of *Gammarus*, modified pore canals in: A study by scanning and transmission microscopy, 659
—, tegumentary glands associated with, 389
Cyclic nucleotide, metabolism of, and the histology of rat liver during carcinogenesis, 463, 477, 495
Cytochasin B, effects of, on the surface morphology of the toad bladder epithelium, an SEM study, 451

D

Desmocytes, in the hydrozoan polyp *Cordylophora*, 113
Differentiation, of flight muscle, in a dragonfly, 167

Digestive system, gastric epithelium in a teleost, 23
— —, pharyngeal bulb in *Protodrilus*, anatomical and ultrastructural study of, 269, 289
— —, salivary glands, of cockroach, axons in, 699
Digestive vacuoles, septate junctions between, in human malakoplakia, 137
— —, — — —, formaldehyde-induced, 735

E

Echinoderm, crinoid, *Comanthus japonica*, fine structure of, from zygote through early gastrula, 93
Egg-shell, of a nematode (*Trichuris suis*), structure and chemistry of, 427
—, trichurid, evidence in support of the Bouligand hypothesis of helicoidal architecture in, 647
Elastic protein, connectin, in lathyritic rat muscle, 741
Electrotonic synapse, of the lateral giant axons in a crayfish (*Procambarus clarkii*), fine structure of, 413
Embryo, chick, definitive erythroid cells in, 355
—, of a crinoid, 93
—, of *Fundulus heteroclitus*, Kupffer's vesicle in, 11
Eosinophil leucocytes, fine structure of granules in, in birds, 303
Endocrine system, parathyroid, of woodchuck, 259
— —, pituitary, of the rat, 671
Endothelial cells, in culture, spreading of: Spatial reorganization of cytoplasmic fibers and organelles, 707
— —, of pulmonary artery, 555
— —, pulmonary, surface replicas of, 441
Enzyme, angiotensin converting, new substrates for the radioassay of, in endothelial cells in culture, 563
Epidermis, of *Lineus ruber*, 227
Epitheliomuscular cell, of *Hydra*, its fine structure, 3-dimensional architecture and relation to morphogenesis, 629
Epithelium, gastric, in a fresh water teleost, ultrastructural and cytochemical study, 23
—, of toad bladder, effects of cytochalasin B on, 451
—, stomodeal, and its cuticle, in the pharyngeal bulb of *Protodrilus*, 289
Erythrocytes, normal and irreversibly sickled, freeze-etch localization and distribution of concanavalin A in, 219
Erythroid cells, definitive, in chick embryo, early origins of, 355
Excretory system, of fish, glycogen-rich cells in kidney of, 319

F

Fibers, cytoplasmic, in endothelial cells in culture, 707
Fibrous structure, of ceolacanth scales, 671
Fish, *Carassius auratus*, kidney of, glycogen-rich cells in, 319
—, *Fundulus heteroclitus*, Kupffer's vesicle in, 11
—, *Perca fluviatilis*, ultrastructural and cytochemical study of the gastric epithelium in, 23
—, SEM of olfactory lamellae of, 1
—, South American lungfish, layers lining the lung of, 343
—, teleost, swimbladder, a possible diffusion barrier to gases in, 785
Flight muscle, differentiation of, in nymphs of a dragonfly, 167
Formaldehyde, -induced appearance of septate junctions between digestive vacuoles, in some pathological cells, 735
Freeze-etch, localization and distribution of concanavalin A, 219
Freeze-fracture, of insect septate junctions, 125
—, of rabbit granulosa cells, 599
—, of tight junctions between choroidal cells, 331
Frog, high resolution SEM of sartorius muscle of, 179
—, lung of, 343
—, origin of protein and fatty yolk in, 525, 535
—, sartorius muscle of, satellite and invasive cells in, 749
Fundulus heteroclitus, Kupffer's vesicle in, 11

G

Gammarus, modified pore canals in the cuticle of, 659
Gap junctional vesicles, in rabbit granulosa cells, origin and fate of, 599
Gastric epithelium, in a fresh water teleostean fish (*Perca fluviatilis*), 23
Gastromermis boophthorae, nematode, anterior sense organs in, 51
Gastrula, early, of *Comanthus*, fine structure of, 93
Geodia cydonium, sponge, aggregation factor in, 191
Gills, of the brown shrimp *Penaeus aztecus*, a morphological study of, 77
Gland, adrenal, of mouse, 571
—, mammary, hormonal activation of peroxidase in, 515
—, parathyroid, of woodchuck, seasonal variations of chief cells in, 259
—, pituitary, anterior, of mouse, 571
—, —, of the rat, 725
—s, salivary, of cockroach, axons associated with, 699
—, tegumentary, secreting protective 'shield' in a sessile insect, fine structure of, 389
Glycogen, in distal segment of nephronic tubule, 319
GMP, cyclic, metabolism of, in rat liver, during carcinogenesis, 495
Granulosa cells, origin and fate of cytoplasmic gap junctional vesicles in, 599

H

Helicoidal architecture, of arthropod cuticle, 647, 659, 671
Histology, of rat liver, during carcinogenesis, 463
Hormonal activation, of mammary gland peroxidase, 515
Human, malakoplakia, septate junctions between digestive vacuolesin, 137

Hydra, epitheliomuscular cell of, its fine structure, 3-dimensional architecture and relation to morphogenesis, 629

I

Insect, *Anax imperator*, differentiation of flight muscle in, 167
—, a single spiral artefact in cuticle of, 39
—, (Homoptera, Diaspididae), fine structure of tegumentary glands in, 389
—, *Nauphoeta cinerea*, salivary apparatus in, 699
—, *Phaenicia serricata*, taste hairs of, 63
—s, septate junction in, 125
Intramembranous structures, and intercellular, comparison between, in septate junctions, 125
Invasive cells, in frog sartorius muscle, 749

J

Junction, myotendinous, of lathyritic rat muscle, 741
—s, myoepithelial, in the pharyngeal bulb of *Protodrilus*, 269
—, septate, between digestive vacuoles in human malakoplakia, 137
—, —, formaldehyde-induced appearance of, between digestive vacuoles in some pathological cells, 735
—, —, in insects, comparison between intercellular and intramembranous structures, 125
—, tight, between rat choroidal cells after osmotic opening induced by urea and sucrose, 331
Juvenile, and adult, nuchal organs of an annelid, comparative ultrastructure of, 243

K

Kidney, of the Prussian carp *Carassius auratus gibelio* (Cyprinidae), III. Glycogen-rich cells in the distal segment of the nephronic tubule of, 319
Kupffer's vesicle, in *Fundulus heteroclitus*, 11

L

Larvae, of the gastropod *Phestilla sibogae*, cephalic sensory organ in, 153
Lepidosiren paradoxa, lungfish, layers lining the lung in, 343
Leucocytes, eosinophil, fine structure of granules in, 303
Lineus ruber, (Rhynchocoela), ultrastructure of epidermis of, 227
Liver, rat, a study of cyclic nucleotide metabolism in, during 3′-methyl-4-dimethylaminoazobenzene carcinogenesis, 463, 477, 495
Loligo pealei, squid, an autoradiographic study of vitellogenesis in, 599
Lung, endothelial cells in, surface replicas of, 441
—, of the South American lungfish (*Lepidosiren paradoxa*) and a comparison with the frog and rat, 343
—, pulmonary artery endothelial cells, isolation and culture of, 555

M

Muscle, cardiac, comparative stereology of mouse and finch left ventricle, 773
—, epitheliomuscular cell of *Hydra*, 629
—, flight, differentiation of, in nymphs of a dragonfly, 167
—, frog sartorius, satellite and invasive cells in, 749
—, insertions, fine structure of, on the larval shell and operculum of the nudibranch *Phestilla sibogae*, before and during metamorphosis, 143
—, rat, fine structure of myotendinous junctions of lathyritic, with special reference to connectin, a muscle elastic protein, 741
—, sartorius, of frog, high resolution scanning electron microscopy of, 179
—, striated, in culture, ultrastructure and mechanical activity expressed by, 201
—s, and myoepithelial junctions, in an archiannelid, 269

N

Nauphoeta cinerea, cockroach, fine structure of axons associated with the salivary apparatus of, 699
Nematode, *Gastromermis boophthorae* (Mermithidae), ultrastructure of the anterior sense organs of adult, 51
—, trichurid, egg-shell of, helicoidal architecture in, 647
—, *Trichuris suis*, egg-shell, structure and chemistry of, 427
Nemertea, *Lineus*, epidermis of, 227
Nephron, distal segment of tubule of, 319
Nerve fibers, of the spiny lobster, microtubules and actin in, 687
Nervous system, axons associated with the salivary apparatus of the cockroach, *Nauphoeta cinerea*, 699
— —, fine structure of the electrotonic synapse of the lateral giant axons in a crayfish, *Procambarus clarkii*, 413
— —, giant nerve fibers of the spiny lobster, 687
— —, sensory, comparison of the ultrastructure of stimulated and unstimulated mechanoreceptors in the taste hairs of the blowfly, *Phaenicia serricata*, 63
— —, —, nuchal organs of an annelid, 243
— —, —, olfactory lamellae of catfish, 1
— —, —, ultrastructure of anterior sense organs of adult *Gastromermis boophthorae* (Nematoda), 51
— —, —, ultrastructure of a cephalic sensory organ in larvae of the gastropod, *Phestilla sibogae*, 153
Nuchal organs, of an annelid, 243
Nucleus, nucleoprotein localization by bismuth staining, 365

O

Olfactory lamellae, of catfish, SEM of, 1
Oocytes, frog, yolk formation in, 525, 535
Operculum, of *Phestilla*, fine structure of muscle insertions on, 143

P

Panulirus argus, crustacean, axons of, 687
Parathyroid gland, of the woodchuck (*Marmota monax*), a study of seasonal variations in the chief cells in, 259
Particle, proteid, from *Geodia*, and species-specific aggregation factor, 191
Pathological cells, human, formaldehyde-induced appearance of septate junctions between digestive vacuoles in, 735
Penaeus aztecus, shrimp, gills of, 77
Perca fluviatilis, fish, gastric epithelium in, 23
Peroxidase, mammary gland, hormonal activation of, 515
Phaenicia serricata, insect, mechanoreceptors in, 63
Pharyngeal bulb, in *Protodrilus*, I. Muscles and myoepithelial junctions, 269
— —, — —, II. The stomodeal epithelium and its cuticle, 289
Phestilla sibogae, mollusc, muscle insertions in, 143
— —, cephalic sensory organ in larvae of, 153
Pituitary, anterior, of the mouse, the effects of adrenalectomy and cortisol treatment on cell types in, other than corticotrophs, 571
— cleft, of the rat, an electron microscopic study, 725
Polyp, hydrozoan, anchoring cells (desmocytes) in, 113
Pore canals, modified, in the cuticle of *Gammarus*, 659
Procambarus clarkii, crayfish, electrotonic synapses in, 413
Proteid, particle, large circular, from a sponge, entire and core structure of, 191
Protodrilus, (Polychaeta: Archiannelida), muscles and myoepithelial junctions in, 269
Protozoa, *Thalassicola nucleata*, feeding bahavior, nutrition and reproduction of, 401
—, xenosomes in, 609

Q

Quantitative morphology, of interstitial tissue channels, 585

R

Rabbit, granulosa cells, origin and fate of cytoplasmic gap junctional vesicles in, 599
—, quantitative morphology of interstitial tissue channels in some tissues of, 585
Radioassay, of angiotensin converting enzyme, new substrates for, 563
Rat, choroidal cells, fine structure of tight junctions between, 331
—, lathyritic muscle of, fine structure of myotendinous junction in, 741
—, liver, carcinogenesis in, 463, 477, 495
—, lung of, 343
—, quantitative morphology of interstitial tissue channels in some tissues of, 585
Replicas, surface, of pulmonary endothelial cells, in culture, 441
Reproduction, feeding behavior and, in laboratory cultures of *Thalassicola nucleata*, 401
Reproductive system, granulosa cells, of rabbit, 599
— —, oocytes of frog, yolk formation in, 525, 535
Respiratory system, gills of shrimp, *Penaeus*, 77
— —, lung, of lungfish, *Lepidosiren*, 343
— —, pulmonary endothelial cells in culture, 441
— —, pulmonary artery endothelial cells, 555

S

Salivary glands, axons associated with, in cockroach, 699
Satellite cells, and invasive cells, in frog sartorius muscle, 749
Scales, of coelacanth, the fibrous structure of; a twisted 'plywood', 671
Sense organs, anterior, of adult *Gastromermis*, 51
SEM, of the channel catfish olfactory lamellae, 1
—, of *Gammarus* cuticle, modified pore canals in, 659
—, high resolution, of frog sartorius muscle, 179
—, of interstitial tissue channels, 585
—, of Kupffer's vesicle of *Fundulus*, 11
—, of mantle of fresh water mussel, *Amblema* (Unionidae), 619
—, of toad bladder epithelium, 451
Septate junctions, between digestive vacuoles, 137, 735
— —, in insects, comparison between intercellular and intramembranous structures, 125
Shell, larval, and operculum of *Phestilla*, fine structure of muscle insertions on, 143
Shrimp, *Penaeus*, gills of, 77
Sickle cells, freeze-etch study, 219
Spiral artefact, single, in arthropod cuticle, 39
Sponge, *Geodia cydonium*, species-specific aggregation factor in, 191
Staining, bismuth, nucleoprotein localization by, 365
Stereology, comparative, of the mouse and finch left ventricle, 773
Substrates, new, for the radioassay of angiotensin converting enzyme, 563
Swimbladders, teleostean, layered membranes in: A possible diffusion barrier to gases, 785
Synapse, electrotonic, of the lateral giant axons in a crayfish, 413

T

Taste hairs, of the blowfly, stimulated and unstimulated, ultrastructure of, 63
Tegumentary glands, secreting the protective 'shield' in a sessile insect (Homoptera: Diaspididae), fine structure of, 389
Thalassicola nucleata, protozoan, 401
Tight junctions, between rat choroidal cells, after osmotic opening, 331
Tissue channels, interstitial, quantitative morphology of, 585
Tissue culture, isolation and culture of pulmonary artery endothelial cells, 555
— —, new substrates for the radioassay of angiotensin converting enzyme, in endothelial cells, 563

— —, of vascular endothelial cells, spatial reorganization of cytoplasmic fibers and organelles, 707
— —, striated muscle, ultrastructure and mechanical activity, 201
— —, surface replicas of pulmonary endothelial cells, 441
Toad, bladder epithelium, effects of cytochalasin B on, 451
Trichuris suis, nematode, egg-shell of, 427, 647

V

Vacuoles, digestive, septate junctions between, 137, 735
Vesicle, Kupffer's, in *Fundulus*, 11
—s, gap junctional, in rabbit granulosa cells, origin and fate of, 599
Vesicular yolk, primary and secondary, in frog oocytes, 525, 535
Vitellogenesis, in the squid, an autoradiographic study, 599

X

Xenosomes, bacterial, observations on the ultrastructure, mode of infectivity and host range of, 609

Y

Yolk, protein and fatty, origin of, in *Rana pipiens*. Intramitochondrial and primary vesicular, and secondary vesicular, 525, 535
—, vitellogenesis in the squid, 599

Z

Zygote, of *Comanthus japonica* (Echinodermata: Crinoidea), 93
